**Encounter with the Dead Theme in Serbian and Italian Literature of the 19th and 20th Centuries (Based on Prose and Drama Narratives)**

**Tema Susreta sa Mrtvima u Srpskoj i Italijanskoj Književnosti Devetnaestog i Dvadesetog Veka (na Primerima Proznih i Dramskih Tekstova)**

Янкович, Андријана М.  
2018 | University of Belgrade (Serbia)

In this work we gained an insight into similarities and differences between Serbian and Italian literature related to encounter with the dead theme in modern epoch. Conversations with the dead, in Luigi Pirandello's work, had converted into conversations between narrator-author with the characters, or dialogues with his own conscience, to later present dr ... ## Local Knowledge, Value Management Application and *Case Based Reasoning* as Decision Support for International Projects

### Управљање вредностима, примена локалних знања и учење избором случајева (*Case Based Reasoning*) као подршка доношењу odluka на међународним пројектима

<b>Abstract</b>	<p>When considering expected population growth in developing countries, international infrastructural and construction projects will present one of the fastest growing sectors of construction industry. Many challenges await international companies entering new and unknown markets, so this research is focused on international projects for which clients lack specific and reliable information about the local market conditions. As key decisions are made in the initial stages of project, this research aims to assess how best to support such decision making process. Value management in construction has been considered increasingly in last decades, particularly with development of Public-Private-Partnerships (PPP) and increasing attractiveness of emerging markets. It is suggested in the literature that Value Management and its application in workshops can be used to determine the client values. Achieving and fulfilling these values will make a construction project successful. Values are critically important to the briefing process in pre-construction stage as they are setting priorities in construction stage and the overall successful delivery of construction projects. In this research, Value Management was used as a framework to deliver support to</p>
